75-84	19.3	33.3	36.0	23.8
85+	3.9	10.1	39.7	7.2

¹Family households consist of a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. All persons not living in households are classified as living in group quarters. Two categories of persons in group quarters are recognized: (1) institutionalized persons and (2) noninstitutionalized persons in group quarters that, for example, includes group homes, rooming houses, and religious group quarters. Nonfamily households consist of a householder living alone or with nonrelatives only.
